 3316952 SS PLATE FEATHERS 197x197x4
 3316956 SS PLATE JUSSI 197x197x4

Intended Use

- The purpose of the SS floor drain cover is to direct run-off water to the floor drain, protect the floor drain and waterproofing, and provide an interior design element for the floor
- The perforations of the SS floor drain cover have considered the requirements of the floor drain standard EN-1253-2.

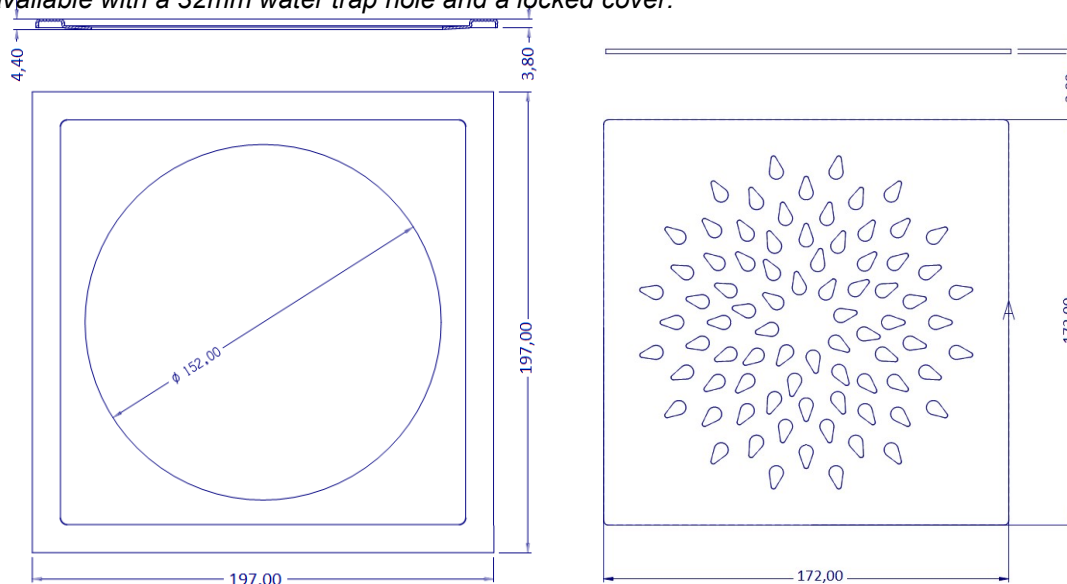

Applications

The SS Design floor drain covers are intended to be installed in connection with the tiling of a premises equipped with a floor drain, as an aesthetic and protective part of the floor drain.

Due to the shape and dimensions of the frame, it is extremely easy to install to the floor in a tight-fitting manner and at a suitable height with the tiling, without water accumulating around the frame.

The frame is made of SS material and can withstand wear, and if necessary, the cover can be replaced for a new one according to the situation and fixtures.

**Also available with a 32mm water trap hole and a locked cover.*
